*UNCONDITIONAL WARRANTY

Coverage by the Yorkville two & ten year unlimited warranty is transferable and it is not necessary to register your name. If, for any reason, any product manufactured by Yorkville Sound should fail within two years (ten years on all wooden enclosure elements) of the original purchase date, we will repair it free of charge. This includes speaker products. Simply return the defective unit to your Yorkville dealer with original proof of purchase and it will be repaired free of charge. Freight charges and damages caused as a result of major accidents or natural disasters (such as fire, automobile wrecks, tornadoes, etc..) are excluded from this warranty.

EXCEPTIONS

Yorkville's TX-Series products carry the same full warranty coverage, however, speakers & drivers are only covered against factory defects. Yorkville's YSM Series Monitors & Coliseum Mini Series are covered by a two year transferable warranty against manufacturing defects. Traynor 'International Series' guitar and bass amplifiers carry a two year transferable warranty against manufacturing defects. This warranty is valid only in Canada or the United States of America.

Paraline Series Loudspeakers

A

Yorkville Sound's **Paraline Series** active full range loudspeaker system delivers the clarity and precision of a complex line array system in a compact, user friendly format. Innovative cabinet design uses Yorkville Sound's proven Paraline high frequency lens technology pioneered in our flagship VTC Elevation Series line array cabinets.

Ideal for mobile PA applications in venues where access to complex trussing or roof hangs isn't practical, the Yorkville PSA1 cabinet mounts quickly and securely on a typical speaker stand. Innovative dual position stand mount offers two potential cabinet angles for expanded setup options. Up to two PSA1 cabinets can be stacked safely and securely on a single traditional stand.

The 2800-watt dual 12-inch active **PSA1S** bass reflex subwoofer is the ideal companion sub for the **PSA1** full range loudspeaker system. Compact design, heavy-duty wheels and handles ensure the **PSA1S** can easily be handled by a single operator for economical system set-up.

PSA1	1200 watts peak- powered - compact array loudspeaker -- 4 x 6" woofers & 2 x 1" drivers on a Paraline lens. 110° wide and 15° vertical dispersion, dual stand mount, locking safety pins and stackable feet	2,399.00
PSA1S	2800 watts peak - powered - compact stackable active subwoofer -- 2 x 12" front loaded woofers, with casters	2,399.00

PSA1RIGKIT	Installation mounting hardware for PSA1 -- for use with PSA1FRAME	79.00 #
PSA1FRAME	Installation and Array Frame for PSA1 - maximum 4 cabinet cluster using PSA1RIGKITS	159.00 #

NX Series Loudspeakers

A

NX series enclosures are manufactured using tough, light weight plastics. In addition, they are UV and moisture resistant. Stand mount and fly points are included. Full range enclosures have been molded for maximum versatility. The trapezoid box is ideal for mounting in arrays, or for use as a monitor, with recessed input jack plate and ideal wedge monitor angle that was taken into account in the initial design. These loudspeakers are ideal P/A solution for install, for mobile DJ, or live music reinforcement.

The YX Series delivers maximum performance in the most cost effective loudspeaker line ever offered by Yorkville Sound. Engineered in North America, the YX Series benefits from Yorkville's forty plus years of PA enclosure design experience in the creation of these high performance yet cost effective general purpose loudspeaker enclosures.

Designed with working musicians in mind, the YX Series offers rugged 5/8-inch plywood cabinet construction, all-metal bar handles, metal input plate, integrated speaker mounts and a custom punched, perforated metal grille to protect the speaker components. A modified trapezoidal shape (YX10, YX12, YX15 and YX15P) ensures the YX Series can function equally as well as a front-of-house or monitor speaker.

All elite subwoofers are suitable for touring or fixed installations. The enclosures are constructed of 15mm birch plywood with heavy internal bracing for reduced resonance and better durability, and covered in black carpet covering. They incorporate metal corner protectors, rugged curved anti-resonant metal grilles, and 1/4" or Speakon™ input connectors. Additionally, the passive models feature Speakon™ connectors and a configuration switch that allows instant reversal of Speakon™ jack pinouts for easy single wire hook-up using optional four wire Speakon™ cables. All elite passive subwoofers (except LS608) now feature rear mounted wheels and handles for east transport.

Clearly Superior...

Ever wonder why high efficiency professional PA systems never sound as clear and concise as a studio monitor? Well so did we...until now. The new Unity™ Series from Yorkville is a radical new loudspeaker design with ultra clear reproduction, extremely linear frequency response, and extremely low distortion. We combined a single compression driver with three sealed-back midrange woofers on a patented Unity™ horn. This single point source assembly combines well with a high efficiency Neodymium woofer to redefine the boundaries of affordable professional PA.

elite éXcursion™ Systems

Compact, Convenient, Complete

The simple concept behind the elite éXcursion Series was to create a powerful, effective and mobile active stereo club system PA centered around one subwoofer and two satellite loudspeakers. Powering all 3 cabinets is a breeze with separate power amplifiers being incorporated into the electronics of the active subwoofer. A complete, self contained and powered system with passive and active crossover networks, equalization, and separate stereo and subwoofer level control all built in, makes the elite éXcursion Series the ultimate in compact live/DJ systems. A complete PA system that truly is "Plug and Play".

XLR and 1/4-inch TRS balanced inputs ensure the elite éXcursion Systems can be connected to any mixer source. Great care was taken during the initial circuit design to ensure good common mode rejection (50 / 60-cycle hum rejection) at the input so this PA system is as free from extraneous noise as possible while in use. Separate gain controls for subwoofer and for the right and left satellite cabinets are easily accessible from the back panel. Warning lights show the user when the system is limiting or clipping at the input. True to Yorkville loudspeaker design, all of the cabinets in the elite éXcursion Series are made with plywood, not MDF or composites.

elite Series Processors

Every elite enclosure can be used with an optional, dedicated stereo processor which is designed to optimize the performance of that specific loudspeaker. The 19" rack-mountable processors interface between the output of the mixer and the input of the power amplifier(s) to provide both pre-equalization and crossover facilities, plus enhanced subsonic protection and hum-rejection.

**TX Series - Concert Loudspeakers for the masses**

Working with system designers as well as component manufacturers, Yorkville was able to incorporate leading edge proprietary technology into the design of the TX series. In-house horn design and manufacturing capabilities have enabled us to do exhaustive experimentation with horn design and interaction. Close working relationships with industry leaders yielded new driver technologies that have been applied using state of the art network and box design techniques.

All boxes incorporate a passive network that is designed to supplement the active crossover networks as well as protect high and mid frequency drivers from accidental exposure to low frequency information. Specific self-calibrating analog processors, incorporating an advanced protection scheme, have been developed for each system to optimize driver performance and amplifier utilization.

Coliseum Series Installation Loudspeakers

A

The COLISEUM series of enclosures is designed for installation applications in small to mid sized venues. Components are designed to combine with unsurpassed sonic clarity and an optimum dispersion pattern. COLISEUM enclosures feature inset metal input-jack plates with binding post and ¼" phone connectors. The enclosures are painted with a white two-part epoxy and incorporate curved, anti-resonance speaker grille constructed of perforated 16 gauge steel. All enclosures and grilles can be easily refinished and feature a grille clip attachment system for easy removal and recovering. The COLISEUM series enclosures are constructed of highly rigid Baltic birch plywood. Their trapezoidal shape is conducive to array-mounting and minimizes lobing difficulties. Fly-points are steel reinforced and engineered to allow easy, flexible and safe enclosure suspension.

YORKVILLE Lighting Products

Yorkville lighting systems are compact, sophisticated and easy to operate and will outperform large, more expensive systems. The basic system consists of a pair of light bars with built in dimmers and a controller. Simply put the bars on stands and plug them each into a separate standard wall receptacle. Link the bars together with one of our dedicated controllers using standard XLR microphone cables and you have even more channels of lights available.

TRAYNOR Custom Valve Series Tube Guitar Amps

A

Classic Canadian-made Traynor Tube Amps

As the desire for real tube tone continues to grow among guitarists, Traynor responds to the demand by re-introducing Traynor Tube Amplifiers! Made famous in the 60's and 70's, Traynor Tube Amps were a hit among both professional and hobby guitarists, and were known for their affordability and great tone.

TRAYNOR Acoustic Master Instrument Amplifiers

A

Traynor Acoustic Master Series

For over thirty-five years musicians have chosen Traynor instrument amplifiers for their great sound and durability. Working directly with players, our engineers have learned a great deal. Effective simplicity was the goal we set for our new line of amps. Active filtering circuits allow effective tonal shaping with fewer knobs and switches. You get the sound you want quickly and easily from a Traynor amp.

AMSTUDIO	65w combo - 8" woofer w/ 1" dome tweeter, 24-bit digital stereo effects processor, XLR / 1/4" Combi-Jack on channel Two, kick-back cabinet design, full EQ and notch filter system, and more	799.00

TRAYNOR DynaGain Series Guitar Amps

A

Traynor DynaGain series was fully designed in Canada. With an up-to-date sound, these full feature combos are larger than most in their class, offering better bass response and a more solid construction. The Celestion speakers used in the DynaGain Series are larger in diameter than almost everything in the same power class, and yield a tone that make these little wonders sound much larger than they look.

Guitar Amps		
DG10	DynaGain 10 – 10w – 8" Celestion Speaker	119.00 *

TRAYNOR International Mate Series Guitar & Bass Amps

A

The Traynor name has long been associated with affordable, great sounding amplifiers. Since the early 1960's, Traynor amplifiers have earned a reputation as cost-effective, highly reliable 'workhorses'. Yorkville Sound is proud to continue this tradition with our latest generation of Guitar Mate, Tube Mate & Bass Mate combos. All Traynor amplifiers come with a comprehensive two year unlimited, no hassle warranty.

Guitar Amps

TRAYNOR Battery Powered Amplifiers**A**

The Traynor battery powered amplifiers are designed for the musician on the move. Perfect for rehearsal or street corner concert, the TVM10 and TVM50's two-channel design allows quick connection to any microphone, instrument or CD / MP3 player. Individual volume control on the input channels and flexible EQ makes the battery powered combos a complete and ultra-compact PA system solution. The wedge monitor shape projects to an intimate audience from ground level, or can be used with its integrated stand adaptor as a small announcement PA or background music source.

TVM10	Travel Mate 10 – 15w combo w/6" spkr & tweeter – battery powered – includes AC charger	249.00
TVM50	Travel Mate 50 – 50w combo w/10" spkr & tweeter – battery powered – includes AC charger	379.00

TRAYNOR Keyboard Amplifiers**A**

Driven by the innovative preamp circuitry, the 'K' series is destined to be more than a monitor, but an integral part of the keyboard player's tone pallet. The heart of these amps is the Tube/Solid State input and Voicing circuitry on the main input channels. In addition to channel EQ's, the multi-position variable Voicing circuit tweaks the EQ and overall presence for specific instruments and applications.

The innovative extra channel post master input located on the back of the amplifier allows additional signal to be fed to the amplifier on stage, without feeding the XLR balanced DI outputs. Sources like monitor feeds from the front of house mix, drum machine click tracks or cue sends can be amplified on stage by the 'K' Series amp, without feeding this channel to the house mix. Designed for the stage, the modified trapezoidal shape allows the amplifier to be used upright to fill the room or stage, or as a convenient wedge monitor for the player.

K1	Mono - 2 Channel + monitor input, 120w - 10" woofer plus horn tweeter, LINK option (with another K1)	849.00
K2	Mono - 2 Channel + monitor input, tube/solid state preamp - 200w - 10" woofer, 4" mid, plus horn tweeter, 5 position voicing, 1/4" balanced outputs	1,099.00
K4	Stereo - 3 Channel + monitor input, tube/solid state preamp, 300w (200w+2x50w), 12" woofer, 2x 5.5" mid, 2x tweeter - 5 position voicing, f/s lead gain w/overdrive trim, subwoofer output, XLR balanced outputs	1,549.00

YORKVILLE Keyboard Amplifiers & Powered Monitors**A**

Versatility, performance and portability best describe Yorkville's keyboard amplifiers. Better fidelity is needed to bring out the complex sounds that today's synthesizers and samplers can provide. Applying our knowledge and experience in professional audio designs, our engineers incorporate the features and performance of high quality P.A. systems into these amps so that they will also faithfully reproduce acoustic-electric instruments, voice, compact discs and tapes. If you're looking for the best in keyboard/mixer amplifiers, look no further than Yorkville. Inside we use high-grade glass epoxy circuit boards, low noise metal film resistors, phone jacks with gold plated contacts. Outside you will find heavy gauge metal speaker grilles, 3/4" plywood construction, rugged carpet covering.

GNLBULB	Bulb for GNL500/600 – 5 watt	2.99

Charge Your Creativity! ART has a complete line of Analog and Digital audio solutions. ART's legendary tube performers include microphone preamplifiers, levelers, dynamics processors and A/D converters. In addition to the tube products ART also makes mixers, equalizers, headphone systems, crossovers and much more!

Project Series

		A
TUBEMP/C	Professional Tube Preamp w/ Opto Compressor-Limiter, transformer isolated XLR output, 48v phantom power.	129.00 #
TUBEMPSP	"Project Series" Edition, tube preamp w/ limiter, selectable input impedance	89.00
TUBEMPUSB	"Project Series" Edition, tube preamp w/ limiter, selectable input impedance and USB output	129.00
USB2DUALPREPS	2-Channel PreAmp w/ USB. Two XLR/ 1/4" Combo inputs, 1/4" TRS outputs, 1/8" headphone output w/ mix/level +48v phantom power. Powered via USB bus, 9V battery or 12V AC adaptor	99.00
USB2DUALTUBE	Two Channel Tube Preamp/Computer Interface. Two Combo inputs, +48v phtm pwr, 1/4" TRS I/O No latency monitoring, 1/8" headphone output. Optical compressor, dual mono modes. USB and S/PDIF I/O	189.00
USBPHONOPLUSPS	Audiophile Computer Interface. RIAA Phone/Line preamp, HP jack w/ monitor, RCA I/O, TOSLINK, S/PDIF, USB2.0	99.00 #
USBMIX	Three Channel Mic-Inst-Line Mixer/Computer Interface. Balance XLR / Unbalanced 1/4" inputs, switchable impedance, 1/4" TRS I/O, headphone monitoring, USB 2.0 output	89.00 #
SYNCGEN	Word Clock Generator. w/ 4BNC outputs, 2 S/PDIF outputs. 44.1KHz-192KHz sample rates	129.00

Single Channel Tube Preamplifiers

		A
TUBEMP	"The Original" Edition tube preamp w/ 12AX7 tube, 48v phantom power, phase invert, 70dB gain	60.00
TUBEMPSTV3	"Studio V3" Edition, tube preamp w/ analog meter, variable valve voicing (V3), limiter	99.00

Multi-Channel Tube Mic PreAmplifiers

		C
TPSII	Tube Preamp System - Twin discrete preamps - V3 Variable Valve Voicing, analog & LED meters - 1U	229.00
DPSII	Tube Preamp System with digital outputs - Twin discrete preamps - V3 Variable Valve Voicing, variable input impedance, analog and LED meters, wordclock in, S/PDIF, ADAT I/O, TOSLINK - 1U	329.00
PROMPAII	Professional Two Channel mic preamp w/ variable input impedance, selectable plate voltage, Stereo/Dual mono modes, Mid/Side micing support, +4/-10dB selectable output	379.00
DMPAII	Professional Two Channel mic preamp w/ variable input impedance, selectable plate voltage, Stereo/Dual mono modes, Mid/Side micing support, +4/-10dB selectable output, w/AES/EBU, ADAT, S/PDIF, word-clock, 24/16 bit switch-able dithering	539.00
TUBEPTO8	Professional eight channel class-A tube mic preamp w/ADAT lit-pipe I/O. Full 24bit audio at 44.1 and 48kHz Input gain & Output level controls, pad, phase flip and roll off per channel. Work Clock in/thru +48v phantom power	559.00

Tube Compressors & Channel Strips

		C
PROVLAI	Studio Vactrol / Tube Leveling amplifier - VCA-less design - dual VU meters - 2U	379.00
PROCHANNELII	Next Generation Pro Channel - Tube mic preamplifier, optical compressor, parametric EQ - 2U	379.00 #
VOICECHANNEL	Tube mic preamplifier with Variable Input Impedance, Compressor / Expander / De-Esser / Gate, Parametric EQ & digital connectivity including ADAT, AES/EBU, S/PDIF, TOSLink and USB	549.00

ART Microphones

Created to complement ART's industry leading brand of tube preamps, tube compressors and recording accessories, the ART M-Series will set the performance standard for professional microphones in this class and price category.
