NEWS RELEASE

Yorkville Sound Debuts the Next Generation of LED Lighting

LP-LED4X

Toronto Ontario - May 2017 -Yorkville Sound, leading manufacturer and distributor of pro audio systems and musical instruments is proud to introduce the next generation of LED Lighting, the LP-LED4X.

The improved LP-LED4X has the same innovative specifications as our successful LP-LED4 Light Bar, but with significant upgrades to deliver maximum performance with minimal complications.

Designed to be the ideal solution for any professional lighting application, the Yorkville Sound LP-LED4X can be easily transported to DJ shows and is capable of lighting a small stage or an entire dancefloor. Built for easy operation and simple integration, a standalone LP-LED4X will provide ample coverage using its advanced on-board programming and effect banks. Multiple LP-LED4X can be connected and operated in unison with a standard microphone cable and our iOS and Android App, via Bluetooth, controls up to four individual LP-LED4X fixtures.

The low profile design and convenient bar handles make transporting the LP LED4X effortless. The innovative pole-through technology encourages versatility, allowing multiple units to be used on a standard speaker stand for large scale mobile applications. Contractors and touring companies will appreciate the integrated flypoints that ensure safe installation or truss mounting in touring rigs, club installs or theatre applications.

LP-LED4X Features:

- DMX is integrated out of the box
- Bluetooth Wireless Control is available for iOS/Android on Phone/Tablet on our free App
- Pole Through Technology for stacking multiple lights or saving space on stage under a loudspeaker
- Built in Microphone for Quick Audio Mode Demos (the ¼" input is still available on the unit, and will bypass the built in mic)
- Lightweight, 5-7 pounds lighter than the LP-LED4
- Same intensity/output/wattage as the LP-LED4
- Will work with the LP-C4/LP-C12/LP-608 Controllers

Yorkville LP-LED4X—MSRP USA \$1899 MAP \$1369
