##### **SMT Disclaimer**

Due to the complex nature of the use of SMT installed components in Yorkville equipment, we highly caution all service technicians in attempting to repair or replace SMT factory installed components.

Many of these components may be glued prior to initial soldering.

**Replacing SMT components requires expensive specialized de-soldering equipment and training.**

Yorkville Sound will repair and replace defective SMT components to ensure proper quality assurance and installation is maintained.

**Quality and Innovation Since 1963**

Contains Transmitter Module FCC ID: 2ADHKBMB83SM1  
Contains Transmitter Module ID: 20266-BM83SM1  
This device complies with Part 15 of the FCC Rules.  
Operation is subject to the following two conditions: (1) this  
device may not cause harmful interference, and (2) this  
device must accept any interference received, including  
interference that may cause undesired operation.

## Specifications

<b>Program Power (watts)</b>	200 watts program (100 Low, 50 Mid, 50 High)
<b>Max SPL (dB)</b>	117dB Cont, 123dB Peak
<b>Frequency Response (Hz +/- 3dB)</b>	60 - 20K (Hz +/-3dB)
<b>Power Consumption While Charging</b>	32 watts (battery fully discharged and unit idling)
<b>Speaker Configuration - LF</b>	8 inch Neo
<b>Speaker Configuration - MF/HF</b>	5-inch/1-inch Dome Neo Coaxial
<b>Inputs</b>	8
<b>Channel 1 Input</b>	XLR / 1/4-inch Combi-jack
<b>Channel 1 Controls</b>	Level, Shape, Reverb
<b>Channel 2 Input</b>	XLR / 1/4-inch Combi-jack
<b>Channel 2 Controls</b>	Level, Shape, Reverb, Acoustic Guitar EQ & Notch
<b>Channel 3 Input</b>	1/8-inch TRS Stereo Jack, XLR / 1/4-inch Combi-jack
<b>Channel 3 Controls</b>	Level, Shape
<b>Master Volume Control</b>	Yes
<b>Link In/Out (type / configuration)</b>	XLR (Male and Female)
<b>LED Indicators</b>	Power, Bluetooth™, 4x Battery Level, Charging Status, Guitar /Mic, Limit (CH1, CH2), Clip (CH3),
<b>Dimensions (DWH xbackW, inches)</b>	11.5 x 10.125 x 15.5
<b>Dimensions (DWH xbackW, cm)</b>	29.2 x 25.7 x 39.3
<b>Weight (lbs / kg)</b>	17 / 7.75

*Specifications subject to change without notice*

## Spécifications

**Puissance Nominale (watts)** 200 watts program (100 Basses, 50 Médianes, 50 Aigues)

**Pression Sonore Max (dB)** 117dB Cont, 123dB Pointe

**Réponse en Fréquence (Hz +/- 3dB)** 60 - 20K (Hz +/-3dB)

**Consommation de puissance durant la charge** 32 watts (batterie complètement déchargée et appareil en attente.)

**Configuration de Haut-Parleur - Basses** 8 pouces Neo

**Configuration de Haut-Parleur - Moyennes/Aigues** 5 pouces neodymium, coaxial

**Entrées** 8

**Entrée Canal 1** Combi-jack XLR / ¼-pouce

**Commandes Canal 1** Niveau, Forme, Réverbération

**Entrée Canal 2** Combi-jack XLR / ¼-pouce

**Commandes Canal 2** Niveau, Forme, Réverbération, EQ Guitare Acoustique  
EQ & Encoche

**Entrée Canal 3** Jack stéréo TRS 1/8-pouce, Combi-jack XLR / ¼-pouce

**Commandes Canal 3** Niveau, Forme,

**Commande de Volume Principale** Oui

**Link Entrée/Sortie (type / configuration)** XLR (Mâle et Femelle)

**DEL indicatrices** Alimentation, Bluetooth™, 4x Niveau de la batterie,  
Témoin de charge Guitare /Mic, Limite (C1, C2), Clip (C3)

**Dimensions (PLH xL arrière, pouces)** 11.5 x 10.125 x 15.5

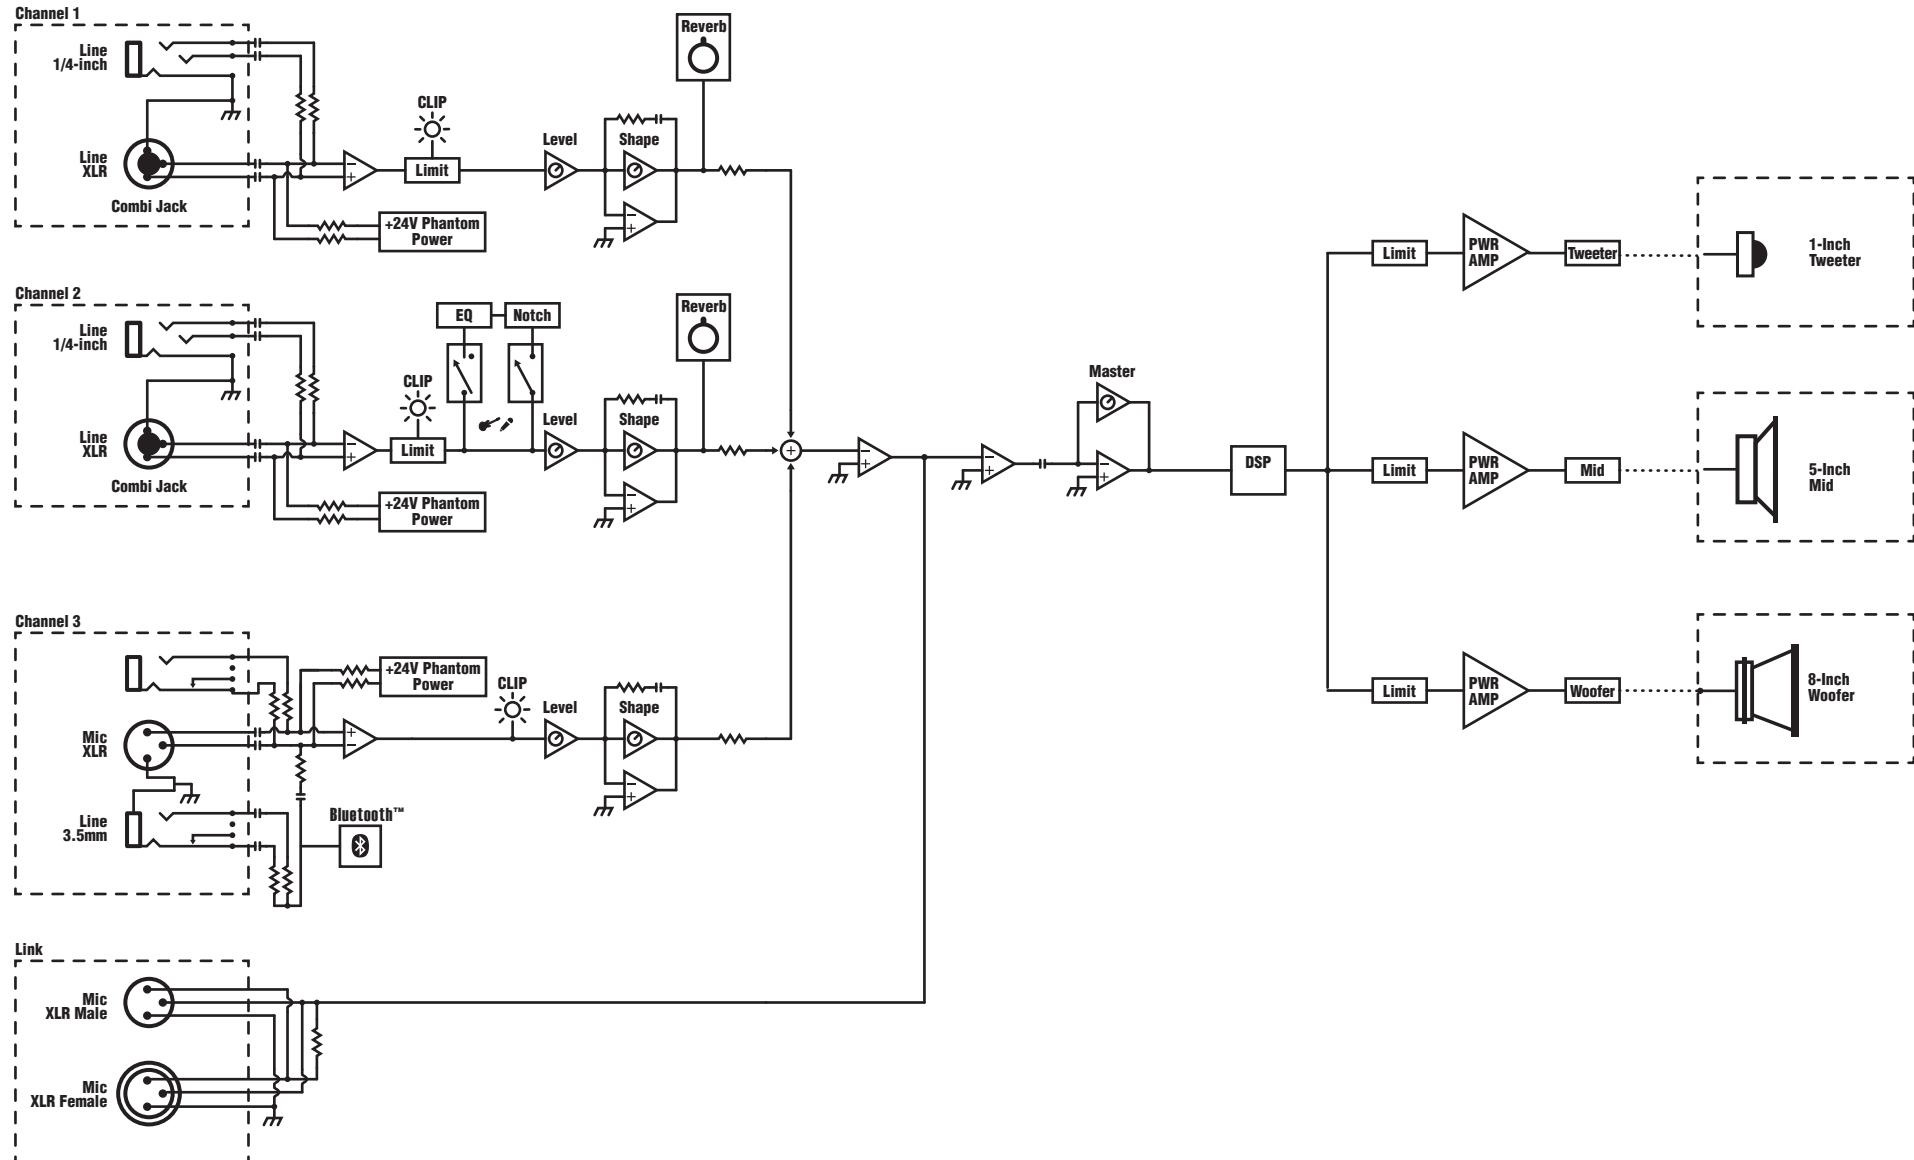

**Dimensions (PLH xL arrière, cm)** 29.2 x 25.7 x 39.3

**Poids (livres / kg)** 17 / 7.75

## CHANGE HISTORY M2000V01P3

JAN-25-2021 VERSION M2000V01P3 DESCRIPTION OF CHANGE	
CHANNEL 1 SECTION	
C2 AND C3 10U REPLACED WITH 1U	
R1 AND R28 475K REPLACED WITH 2K0	
R189 4K99 REPLACED WITH 15K0	
CHANNEL 2 SECTION	
C6 AND C7 10U REPLACED WITH 1U	
R10 AND R14 475K REPLACED WITH 2K0	
R215 3K32 REPLACED WITH 2K0	
R228 15K0 REPLACED WITH 10K0	
R288 4K99 REPLACED WITH 15K0	
CHANNEL 3 SECTION	
C16 PIN2 DISCONNECTED FROM J11:2 PIN RN CONNECTED TO W3A PIN 2.	
C17 PIN2 DISCONNECTED FROM J11:2 PIN TN CONNECTED TO W3A PIN 3.	
R227 4K99 AND C111 10U ADDED BETWEEN TO W3B:PIN 3 AND +Vr_.	
POWER MANAGEMENT SECTION	
R294 47K5 REPLACED WITH 200K0.	
R51,R229 AND R320 100K0 REPLACED WITH TO 200K0.	
D25 PMLL4148 ADDED IN PARALLEL TO R321.	
R294 PIN2 AND C145 PIN1 DISCONNECTED FROM +VS <sub>w</sub> CONNECTED TO Q9 PIN3.	
DIGITAL EFFECTS SECTION	
R91AND R113 100K0 REPLACED WITH 475K.	
D34 PMLL4148 ADDED IN PARALLEL TO R91.	
BLUETOOTH SECTION	
UNCONNECTED NODES AND VIAS REMOVED.	

## CHANGE HISTORY M2000V01P4

FEB-16-2021 VERSION M2000V01P4 DESCRIPTION OF CHANGE	
CHANNEL 1 SECTION	
R6 AND R7 VALUE CHANGE FROM 4K99 TO 1K02.	
C139 AND C147 100N ADDED TO U28 PIN 5 AND PIN 3.	
CHANNEL 2 SECTION	
R11 AND R15 VALUE CHANGE FROM 4K99 TO 1K02.	
C155 AND C157 100N ADDED TO U31 PIN 5 AND PIN 3.	
C62 100N REPLACED WITH 47N / R215 2K0 REPLACED WITH 1K5 / R181 100K0 RELACED WITH 4K99.	
C168 470N ADDED BETWEEN U32:2 AND S1:1 .	
C162 470N ADDED BETWEEN U33:1 AND U32:2.	
CHANNEL 3 SECTION	
R269 4K99 AND C138 10U ADDED TO PIN6 OF U3:2 .	
C138 PIN 2 CONNECTED TO DSP-MICROCONTROLER SECTION U35:1 PIN1.	
MASTER SECTION	
R258 AND R268 VALUE CHANGE FROM 100K0 TO 200K0.	
BLUETOOTH SECTION	
U12 PADS UPDATED	
DSP-MICROCONTROLER SECTION	
THE FOLLOWING COMPONENTS ARE ADDED TO U35:1	
C117,C123 22U_C126 1N8_C134 220P_R230 2K49_R231 10K0 _R234,R240 3K92 _R248 20K5.	
U36 PIN 46 CONNECTED TO C117 PIN 2 AND C33,D13 CONNECTED TO AGND.	
C93 VALUE CHANGE FROM 10P TO 47P.	
D18 AND D19 VALUE CHANGE FROM 7V5 TO 4V7.	
R97 VALUE CHANGE FROM 10K0 TO 4K99.	
R237 VALUE CHANGE FROM 1M0 TO 475K.	
R270 100K0 ADDED BETWEEN D18 AND D19.	
1/4 INCH HOLE ADDED TO #Z1819 HEATSPREADER FOR SNAP IN SPACER.	
POWER MANAGEMENT SECTION	
C161 470N ADDED IN PARALLEL R138.	
BATTERY STATUS SECTION	
R166 6K98 REPLACED WITH 2K49.	

MARCH-17-2021 VERSION M2000V01P7 DESCRIPTION OF CHANGE

W1 FOOTPRINT SIZE CHANGED TO 4.2mm\*4.2mm.

Bluetooth®

# EXM Mobile 8

## Bluetooth™

The EXM Mobile8 is capable of streaming audio from Bluetooth™ enabled devices and supports wireless 'stereo' pairing between two EXM Mobile8s. In Bluetooth™ stereo mode, the first unit acts as the "Primary," playing the left audio channel and additional units are "Secondary" (playing the right channel). The audio source needs to be connected to the Primary EXM Mobile8 unit.

**Operation:** When the EXM Mobile8 is powered on, Bluetooth™ is disabled by default. To turn on Bluetooth™, tap the Bluetooth™ button. If a device has been previously connected, it will attempt to reconnect. If a wireless stereo connection was used, both EXM Mobile8 units will try to re-establish the wireless stereo connection (the same Primary/Secondary roles re-established).

**Pairing:** Press the Bluetooth™ button down and hold for 4 seconds, then release.

**Status:** The blue LED indicates the status of the Bluetooth™ connection, please refer to the chart in the Owner's Manual for more detail.

**Level:** Streamed music's volume can be changed via the connected Bluetooth™ device or channel 3's Level control. Channel 3's Level setting controls the maximum level a connected device can set.

**Stereo Mode:** Wireless stereo playback is supported between two EXM Mobile8s. One acts as the Primary unit while another acts as a Secondary unit. The Primary unit plays the left audio channel while the Secondary unit plays the right. The source device only connects to the Primary unit, not the Secondary.

To enable Stereo Mode, double tap the Bluetooth™ button on the EXM Mobile8 used as the Primary unit (left), then double tap the Bluetooth™ button on the secondary EXM Mobile8 (right). The first unit double tapped becomes the Primary unit (left).

New devices can still be paired to a Primary unit if it's in Stereo Mode. Pairing a device to an EXM Mobile8 that is in Secondary mode will end the stereo wireless connection.

### Button Operation:

**Single Tap:** Enables Bluetooth™

**Double Tap:** Enter Stereo Mode

**Press and Hold (4 seconds):**

Enter Pairing Mode

**Press and Hold (8 seconds):** Disables Bluetooth™

**Range:** The EXM's Bluetooth™ operating range is rated for 10 meters (33 feet) line of sight. The link's quality can be affected by excess wireless traffic in the 2.4 GHz bandwidth or structures between the Bluetooth™ unit and the streaming device.

*Note: When connected with Bluetooth™, ALL audio is streamed from your device. If you don't want the streaming music to be interrupted, turn off 'notifications' on your device.*

## Controls & Input/Output

**Level:** Adjusts the channel's gain, use to adjust the channel's level in the overall mix.

**Shape:** The response is flat in the center position. Setting towards 'Music' shapes the response suited for prerecorded music and setting towards 'Speech' is best for speech and vocals.

**Reverb:** This control determines how much Reverb is applied to the corresponding channel.

**Master:** Used to set the overall level of the EXM Mobile8.

*Note: When two systems are linked together, the Master Control only affects the level of the unit on which it is located.*

**Main Output/Input:** Both male and female XLR jacks are wired in parallel to make it easy to 'link' different EXM enclosures together. Use standard XLR patch cables between cabinets.

## Battery

**Status:** A series of four green LEDs indicate the approximate charge level. The topmost green LED illuminates if charged greater than 75%. The red LED indicates if the battery is critically low (approx. 10% remaining). The indicators only operate when the unit is turned on.

### Low-Power "Sleep" State:

"Sleep" state is a special feature of the EXM Mobile8, this automatic mode reduces energy consumption when the system is not in use, preserving battery life. This mode is nearly undetectable when configured properly. To ensure the sleep state doesn't interfere with normal operation, the output level should be controlled with the Master.

**Charging Indicator:** When AC is connected to the unit, the charging indicator will be enabled. If green, the unit is fully charged. If red, the unit is actively charging.

**Charging:** Plug it into an AC power source using the included power cord.

*The EXM Mobile8 will not charge when the temperature is below 0° C or above 45° C.*

*If the EXM Mobile8 is going to be stored unused for a long period of time (6+ months) it is advisable to periodically plug it in to charge up the battery. If stored for a long period of time unused and it has not been maintained, it is advisable to connect the charger and leave it plugged in for approximately 24 hours.*

The EXM Mobile is delivered with 40-50% of the charge capacity. Please charge your unit for 5-hours prior to initial battery operation!

THIS UNIT CAN  
BE OPERATED  
WHILE CHARGING!

## Bluetooth™

L'EXM Mobile8 est capable de diffuser des flux audio à partir d'appareils compatibles Bluetooth™ et prend en charge le couplage "stéréo" sans fil entre deux EXM Mobile8. En mode stéréo Bluetooth™, la première unité joue le rôle de "primaire", en reproduisant le canal audio gauche, et les unités supplémentaires sont "secondaires" (reproduisant le canal droit). La source audio doit être connectée à l'unité EXM Mobile8 primaire.

**Fonctionnement:** Lorsque l'EXM Mobile8 est mis sous tension, la fonction Bluetooth™ est désactivée par défaut. Pour connecter un appareil, appuyez sur le bouton Bluetooth™. Si un appareil a été précédemment connecté, il tentera de se reconnecter. Si une connexion stéréo sans fil a été utilisée, les deux appareils EXM Mobile8 tenteront de rétablir la connexion stéréo sans fil (les mêmes rôles primaire/secondeur rétablis).

**Jumelage:** Appuyez sur le bouton Bluetooth™ et maintenez-le enfoncé pendant 4 secondes, puis relâchez-le.

**État:** Le voyant bleu indique l'état de la connexion Bluetooth™, veuillez vous référer au tableau du manuel d'utilisation pour plus de détails.

**Niveau:** Le volume de la musique en streaming peut être modifié via le dispositif Bluetooth™ connecté ou la commande de niveau du canal 3. Le réglage de niveau du canal 3 contrôle le niveau maximal qu'un dispositif connecté peut définir.

**Mode Stéréo:** La lecture stéréo sans fil est prise en charge entre deux EXM Mobile8. L'un d'eux joue le rôle d'unité principale et l'autre celui d'unité secondaire. L'unité principale lit le canal audio gauche tandis que l'unité secondaire lit le canal audio droit. L'appareil de source ne se connecte qu'à l'unité principale, pas à l'unité secondaire.

Pour activer le mode stéréo, appuyez deux fois sur le bouton Bluetooth™ de l'EXM Mobile8 utilisé comme unité primaire (à gauche), puis appuyez deux fois sur le bouton Bluetooth™ de l'EXM Mobile8 secondaire (à droite). La première unité sur laquelle vous avez appuyé deux fois sur le bouton devient l'unité primaire (à gauche).

# EXM Mobile 8

Les nouveaux appareils peuvent toujours être appairés à une unité primaire si celle-ci est en mode stéréo. Le jumelage d'un appareil à une EXM Mobile8 qui est en mode secondaire met fin à la connexion sans fil stéréo.

### Fonctionnement des boutons:

**Appuyer une fois:** Active le Bluetooth™

**Appuyer deux fois:** Active le mode stéréo

**Appuyer et maintenir (4 secondes) :**

Entre en mode de jumelage

**Appuyer et maintenir (8 secondes) :**

Désactive le Bluetooth™

**Portée:** La portée de fonctionnement Bluetooth™ de l'EXM est évaluée pour une ligne de vue de 10 mètres (33 pieds). La qualité de la liaison peut être affectée par un excès de trafic sans fil dans la bande passante de 2,4 GHz ou par des structures entre l'unité Bluetooth™ et le dispositif de diffusion.

*Remarque: lorsqu'il est connecté avec Bluetooth™, TOUT le programme sonore est diffusée en continu depuis votre appareil. Si vous ne voulez pas que la musique en streaming soit interrompue, désactivez les "notifications" sur votre appareil.*

### Commandes et Entrées/Sorties

**Niveau (Level):** Règle le gain du canal, utilisé pour régler le niveau du canal dans le mélange global.

**Forme (Shape):** La courbe de réponse est plate en position centrale. Le réglage vers "Music" donne une réponse adaptée à la musique préenregistrée et le réglage vers "Speech" est le meilleur pour la parole et les voix.

**Réverbération (Reverb):** Cette commande détermine la quantité de réverbération appliquée au canal correspondant.

**Maitresse (Master)** : Permet de régler le niveau général de l'EXM Mobile8.

L'EXM Mobile est livré avec 40-50% de la capacité de charge. Assurer de charger votre EXM pour 5 heures avant la première utilisation avec la batterie!

**Bluetooth®**  
Remarque: Lorsque deux systèmes sont reliés entre eux, la commande principale n'affecte que le niveau de l'unité sur laquelle elle se trouve.

**Sortie/Entrée Principale:** Les prises XLR mâles et femelles sont câblées en parallèle pour faciliter la "liaison" de différentes enceintes EXM entre elles. Utilisez des câbles de raccordement XLR standard entre les enceintes.

### Batterie

**État:** Une série de quatre DEL vertes indique le niveau de charge approximatif. La DEL verte la plus haute s'allume si la charge est supérieure à 75 %. La DEL rouge indique si la batterie a atteint un niveau critique (environ 10 % restants). Les indicateurs ne fonctionnent que lorsque l'appareil est allumé.

### État de "Veille" à Faible consommation:

L'état "Sleep" est une caractéristique spéciale de l'EXM Mobile8. Ce mode automatique réduit la consommation d'énergie lorsque le système n'est pas utilisé, préservant ainsi la durée de vie de la batterie. Ce mode est presque indétectable lorsqu'il est configuré correctement. Pour s'assurer que l'état de veille n'interfère pas avec le fonctionnement normal, le niveau de sortie doit être contrôlé avec la commande Master.

**Indicateur de charge:** Lorsque le courant alternatif est connecté à l'unité, l'indicateur de charge est activé. S'il est vert, l'appareil est entièrement chargé. S'il est rouge, l'appareil est en cours de chargement.

**Chargement:** Branchez l'appareil à une source de courant alternatif à l'aide du cordon d'alimentation fourni.

*L'EXM Mobile8 ne se charge pas lorsque la température est inférieure à 0° C ou supérieure à 45° C.*

*Si l'EXM Mobile8 doit rester inutilisé pendant une longue période (plus de 6 mois), il est conseillé de le brancher périodiquement pour recharger la batterie.*

*Si l'appareil a été stocké pendant une longue période sans être utilisé et n'a pas été entretenu, il est conseillé de brancher le chargeur et de le laisser branché pendant environ 24 heures.*

CET APPAREIL PEUT FONCTIONNER PENDANT LE CHARGEMENT!
